

# MarketHub

power to collect, analyse and act

## BENEFITS OF PULSE

How can Pulse by MarketHub help your business? Pulse is a next-generation retail intelligence assistant designed to improve in-store profitability by increasing revenue and margin and reducing losses and waste.

**Pulse gives you back the control of your business and profits by letting you analyse your sales, identify key trends and pinpoint opportunities for growth.**

## How?

Pulse monitors and analyses your sales data to highlight opportunities and identify areas of concern that go unnoticed in-store. You can then use Pulse Programs to improve the revenue and margin across the store.

Retailers such as Eat17, Spar and Roadchef have used Pulse to streamline their businesses, earning more money and saving time.

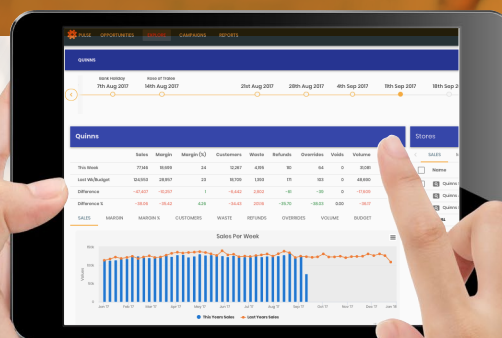

## Pulse advantages

- Increase gross margin
- Reduce waste
- Optimise prices
- Reduce labour
- Improve replenishment
- Measure in-store strategies

## Our Mission

At MarketHub, our mission is to digitize our client's business and provide intelligence-based insights that enable you to grow your business while being simple to execute.

We deliver intuitive technology for businesses that aspire to be truly agile.

roadchef

### Roadchef

Within 7 weeks of using Pulse, Roadchef had reduced waste and overrides by 31% and increased profit by 2.6%.

SPAR

### Byrne's Spar Tralee

This store implemented 700 recommendations with a 85% success rate, increasing their margin by 3.4% and reducing waste by 70%.

eat<sup>17</sup>

### Eat 17

At their store in Hackney, Eat 17 used Pulse to reduce their waste below 2% and increase store margin by 30% GP.

## EVERY RETAILER TRIES THEIR BEST, THEY JUST NEED SOME HELP...

- Even small stores have more than 3000 products to manage on average
- 15% of products are typically in distress eg not selling, low margin, or over-stocked

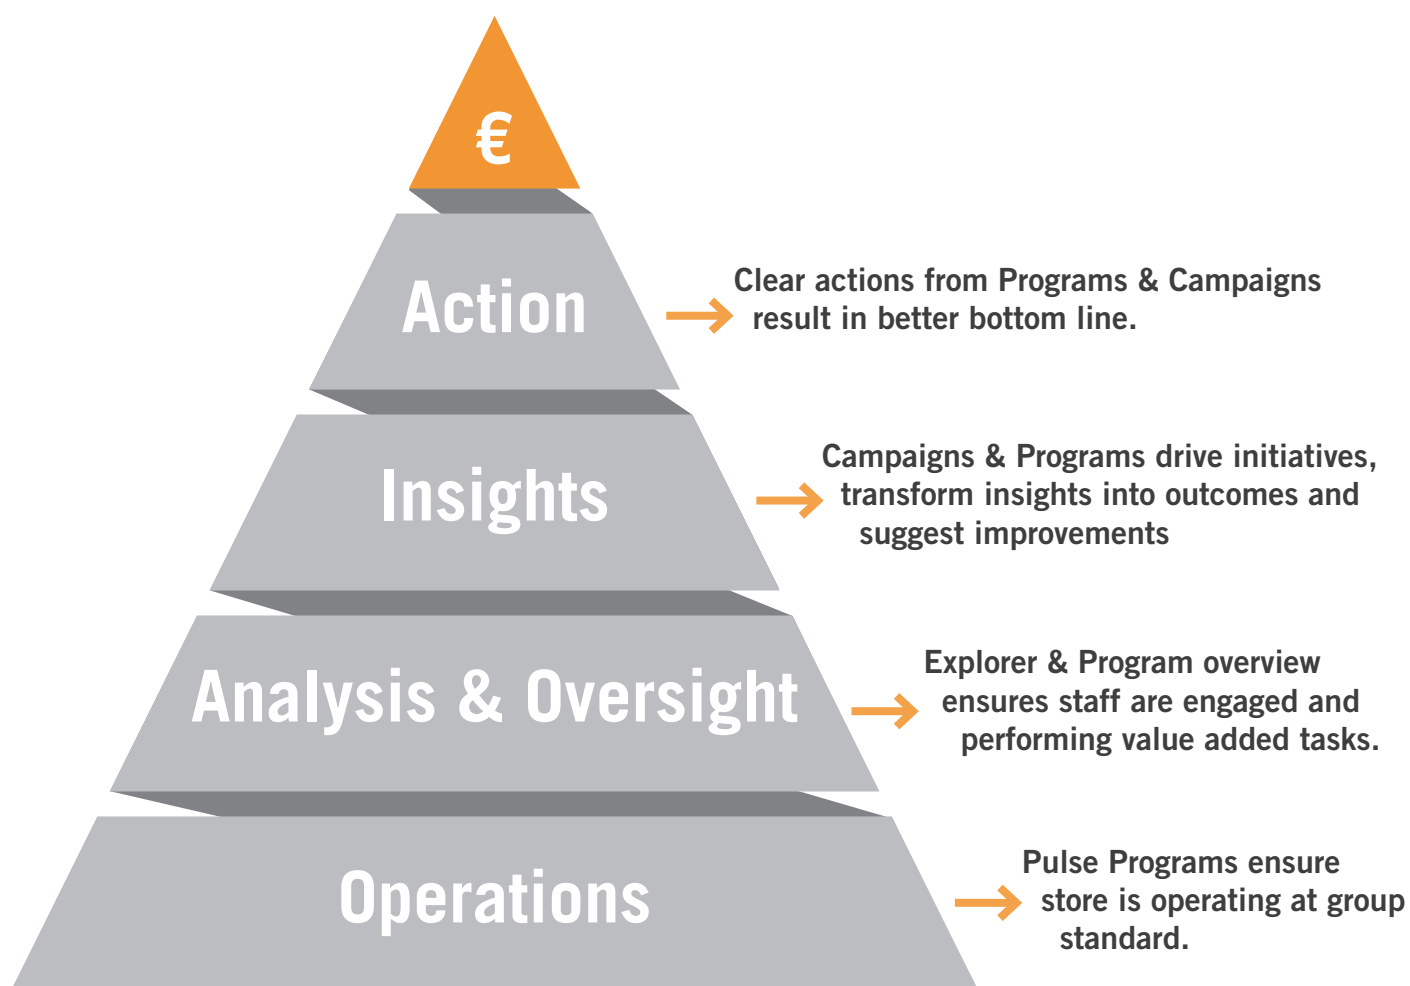

### How Pulse works:

**Pulse Programs** Automated operational performance metrics. Direct your team.

**Pulse Explorer** Compare and review performance across group, store, category and product.

**Pulse Campaigns** Set your strategy. Implement and measure outcomes.

**Pulse Engagement** Inform, alert and track responses. Know what your team are doing.

“

*MarketHub has been an absolute revelation for our business.*

Mark Rogers, Head of Grocery, Roadchef

”

## REVENUE

The Revenue section measures sales performance - telling you which products are making you money, and which are causing problems and losing you money.

Use this section to increase your bottom line and get more profit from your shop. Programs available to help grow revenue include **Dropped Sales**, **Slow Moving Lines** and **Sales Declining**.

**Pulse identifies the following products and gives you effective, actionable recommendations to improve margins and sales**

### Dropped Sales

This report lists products that were selling consistently before last week, when they were not sold at all.

#### Call to action ...

- Is the product out-of-stock?
- Has the product been moved?
- Is the customer no longer calling?

In the example below you can see that there are 130 products that Pulse has identified as dropped, which tells the retailer that they lost €1,232 in revenue last week. Unless these issues are rectified, they will lose €54,588 over the course of a year.

### Slow Moving Lines

The rate of sale of these products is significantly less than the rest of your products.

#### Call to action ...

- Is the product still being carried?
- Is it too expensive?
- Can we remerchandise it?
- Can we discount it?
- Will we Spotlight it?
- Should we replace it?

Increasing the rate of sale by only 1 extra week in the year, in the example below, would increase revenue by more than 8k.

### Sales Declining

These are products that have had a sudden & rapid decline in performance.

#### Call to action ...

- Has it been moved?
- Is it out-of-stock?
- Has it come off promotion?

## PULSE

SNAPSHOT

#### Example:

#### Dropped Sales Program

Items in program: 130  
Lost last week: €1,232  
Avg loss per week: €1,050  
Predicted annual loss: €54,588

## PULSE

SNAPSHOT

#### Example:

#### Slow Moving Lines

Items in program: 130  
Avg revenue per week: €1,010  
Opportunity value: €155  
Opportunity annualised: €8,058

## PULSE

SNAPSHOT

#### Example:

#### Sales Declining

Items in program: 88  
Total loss of revenue: €1,335  
Average loss per week: €1,080  
Predicted annual loss: €56,151

#### Spotlight

Use the Spotlight feature to highlight the product's Electronic Shelf Label to boost sales and see a return from these slow moving products.

## MARGIN

Visit the Margin section of Pulse to see opportunities for increasing your margin. All retailers know that growing their margin by a couple of percentage points has a big impact on their profits, so this is a key area to address in your business.

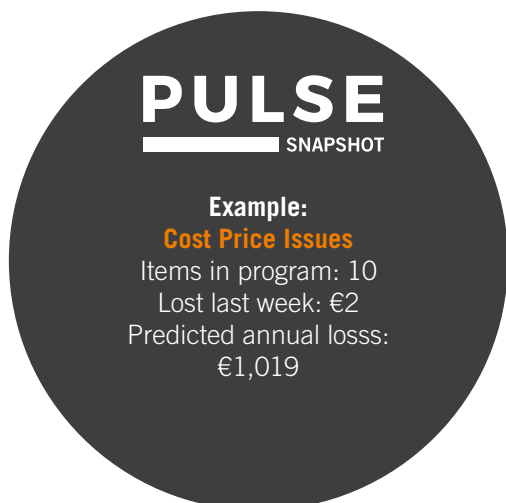

Programs available in Pulse to grow your margin include **Cost Price Issues**, **Price Increase Suggestions**, **Prices Lower than Competition** and **Low Margin**.

### Cost Price Issues

This program identifies products where the cost price is higher than the sale price.

#### Call to action ...

- Check/fix cost price
- Has the product just come off promotion and cost price hasn't been adjusted?
- Check sale price

In the example above, the retailer is losing €20 a week in cost price issues, which adds up to well over €1000 a year. Pulse makes it easy to fix this problem and recover that lost revenue.

### Price Increase Suggestions

This program identifies products that could take a price increase without a loss in volume.

We use machine learning algorithms to identify price elasticity in your store.

#### Call to action ...

- Accept the price suggestion and measure performance

Here, Pulse has chosen 144 products that could be price adjusted in order to gain an additional €88 per week, adding up to €4k over a year. These changes can be easily rolled out over ESLs.

### Price Matching

We compare your prices to your competitors and identify products which are cheaper in your store.

### Low Margin

Within each category, we identify products that are earning significantly less margin than the category average.

#### Call to action ...

- Check your cost price
- Check if on promotion
- Increase the selling price

#### Spotlight

With this information, you can raise the price of the product or highlight the fact that your price is lower than the competitor with a Spotlight on the product label.

## STOCK

Smart businesses know the importance of keeping on top of their stock, and Pulse helps you do this by collating and reporting on your stock turns and value.

There are two programs in the Stock section of Pulse to help you control your stock - **Not Selling** and **Negative Stocks**.

### Not Selling

Not Selling shows all the products that you have in stock which are not selling.

#### Call to action ...

- Check your stock position
- Discount the product
- Remerchandise the product
- Delist the product

#### PULSE SNAPSHOT

##### Example: **Not Selling**

Items in program: 117  
Lost sales last week: €12,517  
Avg lost sales per week: €10,288  
Predicted annual lost sales:  
€534,994

### Negative Stocks

Pulse detects all products with negative stocks. Negative stocks lead to uncertainty and bad replenishment decisions.

#### Call to action ...

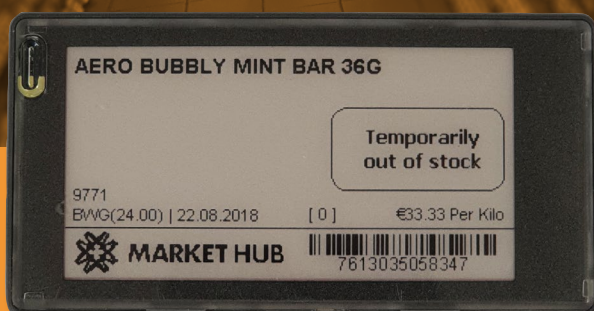

- Check your stock position
- Determine why stock position is negative

#### PULSE SNAPSHOT

##### Example: **Negative Stocks**

Items in program: 588  
Negative stock last week: €135,391  
Avg negative stocks per week: €120,611  
Predicted annual negative stocks:  
€6,272,793

***You can't manage what  
you don't measure***

#### Integrate with labels

You can indicate on your Electronic Shelf Labels the stock position of the product, an Out of Stock message or a Do Not Reorder message for staff.

## LOSSES

The losses section shows precisely how much money you're losing to refunds, overrides and waste.

Waste is just that - you're throwing your money away in unwanted or unusable product. Decreasing your waste levels could save your business thousands per year and Pulse helps you do this by analysing your repeat offenders and showing you exactly where the problems are.

### Refunds

This program lets you keep track of the amount of refunds being issued at the checkout, giving you more control over where your revenue is slipping through the cracks.

#### Call to action ...

- Check your prices on display (most refunds occur due to price discrepancy between till and label)
- Check average volume of refunds by staff member

### Waste

Waste needs to be managed. It is a necessary part of trading in fresh goods. This program identifies products with excessive waste.

#### Call to action ...

- Review waste patterns
- Set up replenishment campaigns
- Staff training in waste control

### Overrides

Pricing issues can be easily missed in a busy store but Pulse records all the till overrides to let you see where pricing issues are affecting your sales.

#### Call to action ...

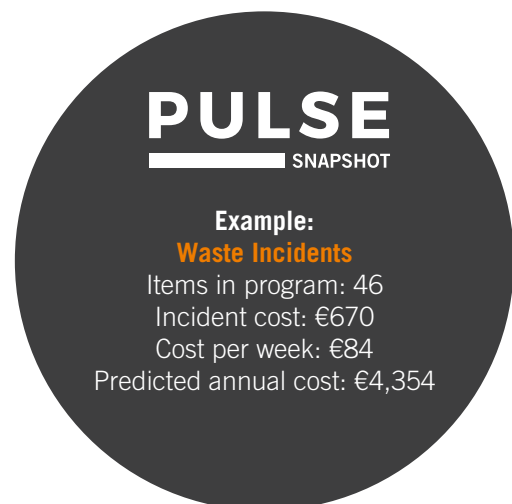

- Review the overrides and patterns

### Waste Incidents

Here you'll see unusual waste activity flagged, such as waste on products that normally see little or no waste. This lets you keep on top of expensive mistakes or issues.

#### Call to action ...

- Review the incidents
- Staff training in waste control

---

**Retailers who have used Pulse have seen up to  
50% reduction in waste**

*[Pulse] reduced wastage at our  
Hackney SPAR store to below 2%*  
James Brundle, Director, SPAR, Eat 17

## CAMPAIGNS

Remember, you can't manage what you don't measure.

The campaigns section of Pulse keeps track of the recommendations you implement so you can monitor their effectiveness. All price changes that you make based on Pulse recommendations are monitored and reported on through campaigns.

**You can also set up your own campaigns to measure the effectiveness of:**

• Promotions • Merchandising • Replenishment • Events • Spotlight

### Events

If you have local events (festivals, sporting events etc), create an event campaign to monitor the changes in demand on products in your store to ensure you always have the right products at the right time.

### Replenishment

Use replenishment campaigns to tell you how much of any particular item you need on a daily basis.

These campaigns help reduce waste, and maximise sales.

Brilliant for keeping on top of short shelf life fresh product. We have retailers using these campaigns for in-store sandwich production, in-store bakery production and chill replenishment.

### Spotlight

Working with labels, you can set up Spotlight campaigns to promote a range of products instantly.

For example: Take all your fresh meats and put them in a BBQ campaign and switch this campaign on in the morning if the weather is suitable. While this campaign is on, all your labels could say "Time for a BBQ?"

You can also use Spotlight campaigns to highlight and push slow moving lines eg "Wine of the Week".

### Promotional Campaign

Starts : 25/07/2018

Versus : 24/07/2017

Ends : 31/08/2018

To : 29/07/2018

## LABEL INTEGRATION

“ I started using Pulse in my forecourt shop in July 2016. Within weeks I was so impressed with the results that I had it ordered it for my other two stores. ”

Louis Byrne, Manager, Byrnes Spar Group

## WHAT ARE THE NEXT STEPS?

Would you like to implement Pulse and/or Electronic Shelf Labels in your business? To get started, just email [sales@market-hub.net](mailto:sales@market-hub.net) and we'll guide you through the set-up process.

## Here's an overview of the process for both Pulse and ESLs:

### Pulse

- **WEEK 1**
  - Demo of capabilities & features of Pulse
  - Set up data feed with your EPOS provider and download 2 years of history
- **WEEK 2**
  - We process and review data received from EPOS vendor
- **PULSE NOW LIVE**
- **WEEK 3**
  - Introduction to your system (1 hr video conference)
  - Access to training videos and help documents
- **WEEK 4**
  - Week 4 follow up (30 min video conference)
- **WEEK 6**
  - Week 6 follow up (30 min video conference)
  - Access to ongoing webinars
  - Extra training can be organised if required

### ESLs

- **WEEK 1**
  - Sign up and store information
- **WEEK 2**
  - Site survey by MarketHub technician
- **WEEK 3**
  - Access point fit out and wifi installation
- **WEEK 6**
  - Label installations and staff training
- **LABELS NOW LIVE**
